Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-6, 10-15, 19 and 20 are rejected as being indefinite in that it fails to point out what is included or excluded by the claim language. These claims are omnibus type claims.

Claim 2 is indefinite. The recitation of the negative limitation "unlike the preexisting natural articular configuration" fails to positively set forth structure that defines the joint prosthesis.

Claims 3-5 are indefinite. It is not clear as to how the manner in which the component is affixed to the body further defines the structural and physical configuration of the component.

Claim 6 is indefinite. The claims fails to positively set forth elements to perform the function as claimed.

Claim 2 is indefinite. The recitation of the negative limitation "unlike the preexisting natural articular configuration" fails to positively set forth structure that defines the joint prosthesis.

Claim 11 is indefinite. The recitation of the negative limitation “unlike the preexisting natural articular configuration” fails to positively set forth structure that defines the joint prosthesis.

Claims 12-14 are indefinite. It is not clear as to how the manner in which the component is affixed to the body further defines the structural and physical configuration of the component.

Claim 15 is indefinite. The claims fails to positively set forth elements to perform the function as claimed.

Claim 18 is indefinite. The recitation of the negative limitation “unlike the preexisting natural articular configuration” fails to positively set forth structure that defines the joint prosthesis.

Claim 20 is indefinite. The recitation of the negative limitation “unlike the preexisting natural articular configuration” fails to positively set forth structure that defines the joint prosthesis.

Claim 23 is indefinite. The recitation of the negative limitation “unlike the preexisting natural articular configuration” fails to positively set forth structure that defines the joint prosthesis.

Claim Rejections - 35 USC § 102

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3738

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Fitz (5571191).

Fitz discloses an artificial facet joint comprising components configured and sized to replace the cephalad and caudal component of the vertebral body. In so far as the claims can be structurally determined and definite, the facet joint of Fitz anticipates the invention.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Martin (6132464).

Martin discloses an artificial facet joint comprising components configured and sized to replace the cephalad and caudal component of the vertebral body. In so far as

Art Unit: 3738

the claims can be structurally determined and definite, the facet joint of Martin anticipates the invention.
